Discussion. This study used recent data with greater population coverage than past studies (4,5) to document geographic variation in pediatric cancer incidence rates by sex, age, type, and race/ethnicity. Consistent with past reports (1,4,5), pediatric cancer rates were highest in males, persons aged 0–4 years and 15–19 years, whites, and the Northeast U.S. Census region.

Geographic Variation in Pediatric Cancer Incidence

Pediatric Journal (Pediatric dimensions) is an open access journal with a rapid comprehensive peer review and publication process. The journal offers a platform, which encompasses the entire scope of Pediatric research and practice. Know more!

Abstract. Pediatric patients cared for in emergency departments (EDs) are at high risk of medication errors for a variety of reasons. A multidisciplinary panel was convened by the Emergency Medical Services for Children program and the American Academy of Pediatrics Committee on Pediatric Emergency Medicine to initiate a discussion on medication safety in the ED.

Pediatric Medication Safety in the Emergency Department

NYU Langone Health's Department of Child and Adolescent Psychiatry was founded in 1997 to improve the treatment of child psychiatric disorders through scientific practice, research, and education, and to eliminate the stigma of being or having a child with a psychiatric disorder.
