Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.

- During your critical thinking processes, there are several pitfalls you might fall into. But you can avoid them. The most common pitfall is jumping to answers too quickly. You think you know what the problem is, and you rush off to solve it. Some of the tools you can use to avoid that pitfall are first: defining your problem well, having that clear problem statement.
