

proceedings of asme fluids pdf

This paper complements an earlier paper by Karnitz, Potter, and Smith [1] (1974) in which the mechanism of the transition of a plane Poiseuille flow between parallel plates was examined.

An Experimental Investigation of Incompressible Channel

ASME PTC-10 (2009) provides a test procedure to determine the thermodynamic performance of centrifugal compressors for gases conforming to ideal gas laws and for real gases. It requires using real gas calculation methods where the compressibility values depart from the specified limits. ASME PTC-10 ...

ASME PTC-10 Performance Testing of Centrifugal Compressors

Scitation is home to the most influential news, comment

The heat-transfer coefficient between fluid and tube wall in turbulent flow depends upon the physical and thermal properties of the fluid. When density changes across the diameter of the tube are large (for example, when the fluid is near the critical point), the variable density can affect the transfer of momentum and heat.

The Effect of Density Variation on Heat Transfer - ASME DC

Superhydrophilic Nano-Structured Coatings (SHNC) were discovered during pool boiling experiments using nanofluids with alumina nanoparticles. During nucleate boiling, the nanoparticles are deposited on the heater surface, forming a uniform oxide coating.

Wetting & Wicking Effects of Superhydrophilic - ASME DC

This paper describes a method for evaluating the structural adequacy of various lifting lugs utilized in the erection and up righting of large pressure vessels.

Proposed Design Criterion for Vessel Lifting Lugs in Lieu

ERRORS IN BOILER EFFICIENCY STANDARDS - Exergetic Systems

Professor David White is a Professor of Infrastructure Geotechnics within Engineering and Physical Sciences at the University of Southampton.

Prof David White | Professor of Infrastructure Geotechnics

Software Availability. All software and a manual (Heat Transfer Tools) consisting of about 100 pages of documentation were originally published by McGraw-Hill in July 2001. In addition to the software, the CD-Rom includes about 60 additional pages in "pdf" files detailing the numerical modeling used "behind the scenes," making these materials very appropriate for use at the graduate level as ...

HTT Heat Transfer Educational Software

A magnetohydrodynamic drive or MHD accelerator is a method for propelling vehicles using only electric and magnetic fields with no moving parts, accelerating an electrically conductive propellant (liquid or gas) with magnetohydrodynamics. The fluid is directed to the rear and as a reaction, the vehicle accelerates forward.. The first studies examining MHD in the field of marine propulsion date ...

Magnetohydrodynamic drive - Wikipedia

Abstract " Pressure vessels store substances under pressure higher than atmospheric conditions and are found all over the place. They are used in homes and hospitals for hot water storage, in many different factories and plants, and in mining

Accidents in Pressure Vessels: Hazard Awareness

The vortex tube, also known as the Ranque-Hilsch vortex tube, is a mechanical device that separates a compressed gas into hot and cold streams. The gas emerging from the "hot" end can reach temperatures of 200 °C (392 °F), and the gas emerging from the "cold end" can reach ~50 °C (~58 °F). It has no moving parts.. Pressurised gas is injected tangentially into a swirl chamber and ...

Vortex tube - Wikipedia

Here, a solar domestic hot water system is set as an example. Fig. 1 presents the schematic diagram of a SDHW system, which generally consists of three main parts, namely, solar heating loop, user load loop, and water tank with thermal stratification. The central connection of the two loops is the water tank, while the task of solar heating loop is to generate hot water filled into the storage ...

Thermal stratification within the water tank - ScienceDirect

2. The fundamentals of additive manufacturing. The fundamental attributes of Additive Manufacturing technologies are presented in this section. Additional information on AM processes can be found in prior overviews , , , .AM processes fabricate parts by creating successive cross-sectional layers of an object.

The status, challenges, and future of additive
