Scalping is the shortest time frame in trading and it exploits small changes in currency prices. Scalpers attempt to act like traditional market makers or specialists. To make the spread means to buy at the Bid price and sell at the Ask price, in order to gain the bid/ask difference. This procedure allows for profit even when the bid and ask don't move at all, as long as there are traders who ...

In finance, flow trading occurs when a firm trades stocks, bonds, currencies, commodities, their derivatives, or other financial instruments, with funds from a client, rather than its own funds.. Flow trading can be a significant source of profits for investment banks. Engaging in flow trading can also boost a firm's own proprietary trading profits via access to information on client activities.
