Learn with SAE. SAE International is the global leader in technical learning for the mobility industry. Whether you are an engineer or business professional looking to advance your career, or an educator in search of creative and effective ways to engage students in STEM programs, we have you covered.

SAE International

The cost of designing and developing a complex integrated circuit is quite high, normally in the multiple tens of millions of dollars. Therefore, it only makes economic sense to produce integrated circuit products with high production volume, so the non-recurring engineering (NRE) costs are spread across typically millions of production units.. Modern semiconductor chips have billions of ...
